Data quality note: Q1 2026 has ~8.3% rows with unresolved tickers (vs 4.8% in Q4), mostly foreign-domiciled biotechs (CUSIPs starting with G/N/Y) and recent IPOs/de-SPACs. Aggregation here is by CUSIP, so position deltas are correct, but some tickers display as — until the OpenFIGI resolver is refreshed. Industry comes from data/prices.db.ticker_snapshot; rows showing (*unresolved*) need a Module-4a snapshot refresh to populate industry/market-cap.
